25X1

1. The aircraft factory at Swidnik, approximately eight km. east of Lublin,[1] is still under construction and organization. The USSR granted the plant a licence for the construction of MIG-15 jet fighters. The manufacture of compressors for the jet turbine was not included in the licence. The engineers at the factory designed a compressor by means of which the speed of the MIG-15 could be increased by approximately 80 km.

2. At the beginning of 1953 a prototype of the MIG-15 produced at the plant was nearing completion.

3. This aircraft plant is closely connected with the one at Mielec (R51/V37).
